

Colorado Life Trak

Protecting Those Who Wander

What is Life Trak?

It is a program to assist residents who have medical conditions that may cause them to wander. The project is a rapid response partnership between law enforcement and the families of those suffering from Alzheimer's Disease and related disorders and conditions such as Autism or Down Syndrome.

What the Program Offers

- A “tried and true” radio technology that provides tracking through a wristband worn by the participant that is waterproofed—no need to remove for bathing.
- Rescue teams from the sheriff's office or police department in your area.
- Reduced search times from hours and days to minutes.
- A proven lifesaving system that is reliable, responsive, practical and affordable.

How Colorado Life Trak Works

A family member or caregiver of a loved one who may wander can the police department (listed below) to enroll in Life Trak. Participants wear a personalized wristband that emits a tracking signal 24 hours a day, seven days a week over several miles.

Caregivers notify the police department or sheriff's office when a participant is missing and only at that point is the tracking system utilized to track the missing person. A search and rescue team responds to the call and uses a mobile locator tracking system to find the participant.
