

Investor presentations 2008

We have decided to hold a series of investor briefings on specific topics instead of a single investor day.

Operational management will give a short presentation on a dial-in conference call, followed by a Q&A session. Each will last 15-30 minutes

The calls will be hosted by Morgan Stanley and Credit Suisse.

Topics will include:

- PR Newswire - Update covering growth outside the USA and specific US projects
- TechInsights - The growth of our Semi Conductor, Intellectual Property business
- TechWeb - The growth and globalisation of Interop, Web2.0, Black Hat, VoiceCon and performance marketing
- Delayering - The success of various efficiency initiatives
- Trading outlook - The prospects for UBM's businesses

The dates of these calls will be posted on the web shortly. We would also encourage everyone to come forward with topics which we can cover on further presentations. Please contact Christiana Sosah at Christiana.sosah@ubmgroun.biz with any suggestions.
