About Toujeo®
Toujeo® (insulin glargine injection) U-300 is a once-daily, long-acting basal insulin to improve glycemic control in adults living with type 1 and type 2 diabetes. Toujeo® received approval from the U.S. Food and Drug Administration (FDA) on February 25, 2015, and is currently pending marketing authorization with the European Medicines Agency (EMA) and other health authorities around the world.

Key Features of Toujeo®
- **Improved glycemic control:** Toujeo® improves glycemic control in adults living with type 1 and type 2 diabetes.
- **An additional basal insulin option:** Toujeo® provides an additional treatment option for those who are new to insulin, are uncontrolled on their current basal insulin or are unsatisfied with their current treatment.

Dosage and Administration of Toujeo®
- Toujeo® is administered once daily through Toujeo® SoloSTAR®, a disposable prefilled pen which contains 450 units of Toujeo®.
- Toujeo® is taken once daily at any time during the day, at the same time every day.
- Dosage adjustments may be needed with changes in physical activity, changes in meal patterns, changes in renal or hepatic function or during acute illness.

Patient Support Program
- Toujeo® COACH is a tailored approach where the patient is surrounded by a suite of educational offerings when they are first prescribed Toujeo®.

Indications and Usage for Toujeo®
Prescription Toujeo® is a long-acting insulin used to treat adults with type 2 and type 1 diabetes for the control of high blood sugar. It should be taken once a day at the same time each day to lower blood glucose.

Do not use Toujeo® to treat diabetic ketoacidosis.

Important Safety Information for Toujeo® (insulin glargine injection) U-300

Do not take Toujeo® during episodes of low blood sugar or if you are allergic to insulin or any of the inactive ingredients in Toujeo®.

Please see Important Safety Information for Toujeo® on the following page.

Please see full Prescribing Information for Toujeo® on Toujeo.com or click here [http://products.sanofi.us/Toujeo/Toujeo.pdf](http://products.sanofi.us/Toujeo/Toujeo.pdf).
Important Safety Information for Toujeo® (insulin glargine injection) U-300 (continued)

Do not share needles, insulin pens or syringes with others. Do NOT reuse needles.

You must test your blood sugar levels daily while using any insulin, including Toujeo®. Do not make any changes to your dose or type of insulin without talking to your healthcare provider. Toujeo® contains 300 units per milliliter (300 units/mL). You should always verify that you have the correct insulin before each injection. Your dose for Toujeo® may be different from other insulins you have taken. Any change of insulin should be made cautiously and only under medical supervision.

Do NOT dilute or mix Toujeo® with any other insulin or solution. It will not work as intended and you may lose blood sugar control, which could be serious. Toujeo® must only be used if the solution is clear and colorless with no particles visible.

Tell your doctor about other medicines, especially ones commonly called TZDs (thiazolidinediones), and supplements you are taking because they can change the way insulin works. Before starting Toujeo®, tell your doctor about all your medical conditions, including if you have liver or kidney problems, are pregnant or planning to become, pregnant, or are breastfeeding or planning to breast-feed. If you have heart failure, it may get worse while taking TZDs with Toujeo®.

The most common side effect of any insulin, including Toujeo®, is low blood sugar (hypoglycemia), which may be serious and can be life-threatening. Symptoms of serious low blood sugar may include shaking, sweating, fast heartbeat and blurred vision. Severe hypoglycemia may cause harm to your heart or brain. Other possible side effects may include swelling, weight gain and allergic reactions. In rare cases, some allergic reactions may be life-threatening. Injection site reactions are also possible and may include changes in fat tissue at the injection site, skin thickening, redness, swelling and itching.

Toujeo® SoloStar® is a disposable prefilled insulin pen. Please talk to your healthcare provider about proper injection technique and follow instructions in the Instruction Leaflet that accompanies the pen.

Please see Important Safety Information for Toujeo® on the previous page.
